Transition from Academia to Industry – Do it Right

Masha Fridkis-Hareli, Ph.D.

Dr. Fridkis-Hareli is an immunologist, consultant and inventor with over 20 years of experience in academia and industry. Compounds she designed and developed during her postdoctoral training at Harvard are currently in pre-clinical and in Phase II clinical trials. She subsequently served as a PI at the Molecular Immunology Foundation at the Dana-Farber Cancer Institute. From 2006 through 2011, Dr. Fridkis-Hareli held a variety of positions at a number of small biotechnology companies and a global clinical research organization. Recently, in the role of Associate Scientific Director, she contributed to the discovery and development of Taligan Therapeutics' drug pipeline leading to acquisition by Alexion Pharmaceuticals. She is also past president of the Association for Women in Science in Massachusetts and is an adjunct professor at Emmanuel College.

Come and learn about industry processes, culture and work environment and how to make a successful transition from academia to industry!

June 15, 2012
